

Australia's largest poultry farm

Riverlands Free Range Poultry.

Check out this recently completed 1.4MW Solar installation at Australia's largest poultry farm, Riverlands Free Range Poultry.

This is just a few of the 28 poultry sheds that have solar installed on them, with over 4200 panels installed, and 28 50kW inverters. This is across seven poultry farms on the one property and is Australia's largest freerange poultry farm.

Total installation is 1.4MW of solar.

Excellent ROI (Return on Investment) and IRR (Internal Rate of Return)

The system is designed for expansion when the need arises in the future.

A full wireless network has been created and installed across 9kms to link and communicate all the systems and the common point of coupling with the electricity network is via a virtual NMI and SCADA system. Remote control is in place.
